

# Secondary Science Overview

## Vision

To equip students to ethically engage in scientific inquiry, data analysis, and model-making so they will be able to solve real-world problems within the framework of a biblical worldview.

## Goals

- Extend scientific knowledge
- Guide students in applying scientific knowledge and skills in ethical ways to solve real-world problems, using activities that include collaborative STEM experiences
- Enable students to create models that describe the natural world and use them to make predictions
- Equip students with the skills to interpret informational text and apply scientific knowledge in accordance with biblical teaching
